

REMARKS

The present Preliminary Amendment is submitted with the Continuation Application enclosed herewith. The Continuation Application is based on and claims the priority of patent application number 09/973,442, filed October 9, 2001, which was based on and claimed the priority of provisional application number 60/242,276, filed October 20, 2000, and provisional application number 60/263,941, filed January 24, 2001. The amendments contained in this Preliminary Amendment should be considered prior to calculating the filing fee.

By this Preliminary Amendment, claims 36, 41 and 43-49 have been amended, claims 1-35, 37-40 and 42 have been canceled without prejudice, and new claims 50-73 have been added. Upon entry of this amendment, claims 36, 41 and 43-73 will be pending in this Continuation Application.

All claim amendments and new claims are fully supported throughout the specification and figures. For example, the Examiner's attention is directed to pages 16, 25-27 and 30-35 of the specification and the associated figures. However, support for the new claims, as well as the other current claim amendments, is provided throughout the specification. No new matter has been added.

The pending claims are believed to be in condition for allowance. However, if the Examiner believes certain amendments are necessary to clarify the present claims or if the Examiner wishes to resolve other issues by way of a telephone conference, the Examiner is kindly invited to contact the undersigned attorney at the telephone number indicated below.

Respectfully submitted,

Date: March 12, 2004

Bryan L. White, Reg. No. 45,211
